Information

Formal Name: *Harpegnathos saltator*

Nickname: Jerdon's Jumping Ant

Habitat: Live in nests underground near plant roots. Originated from India.

Predators: Jumping ants can jump up to 2 cm high and 10 cm in distance to escape danger or catch flying prey.

Population: Small number of individuals per colony, but like other ant species their colonies include mostly female workers.

Mike Milkweed Is Adam's mom still the Queen?

5 milliseconds ago • [Like](#)

Derek Dragonfly Adam's mom is still queen, but I'm going to be crowned the Ugly Bug Contest champion this year, I can feel it in my wings.
